Ender Batu Demirtaş

(307) 301-7092 | ba2demirtas@gmail.com | LinkedIn | GitHub | Irvine, CA

Education

California State University, Fullerton Fullerton, CA

Bachelor of Science in Computer Science *May 2026*

- **Relevant Coursework:** Data Structures, Software Engineering, Operating Systems, OOP, Back-end Development, Machine Learning
- **Certification:** AWS Certified Generative AI Developer – Professional (AIP-C01), exam scheduled November 2026

Technical Skills

Programming Languages: Python, C++, Swift, SQL
Generative AI: Amazon Bedrock (Agents, Knowledge Bases, Guardrails), Bedrock AgentCore, Strands Agents, LangGraph, RAG, Vector Search, Prompt Engineering, LLM Evaluation
Cloud: AWS (Bedrock, Lambda, API Gateway, Step Functions, S3, RDS, IAM, KMS, Secrets Manager, CloudWatch, App Runner, EC2)
Frameworks & Libraries: FastAPI, Pydantic, Streamlit, pandas, scikit-learn, SwiftUI, SwiftData
Tools & Collaboration: Git, GitHub Kanban, Jira, Confluence, Slack
Technical Concepts: Algorithms, Machine Learning, REST APIs, CI/CD, Data Pipelines, Unit Testing

Projects

NL2SQL Chatbot | *Python, FastAPI, Strands Agents, Amazon Bedrock, AWS* September 2025 – November 2025

- Built a chatbot that lets non-technical users query a **PostgreSQL** database in plain English, using a **Strands** agent on **Amazon Bedrock** (Claude 3.5 Haiku) that calls custom tools to generate and run SQL.
- Served the agent through a **FastAPI** backend and a lightweight web UI, keeping database credentials in **AWS Secrets Manager** instead of code.
- Containerized and deployed the service to **AWS App Runner**, backed by a **PostgreSQL** database on **AWS RDS**.

Memoria | *SwiftUI, SwiftData, Swift Charts, macOS + iOS* | Solo Developer January 2026 – Present

- Shipped **4 releases** of an offline-first trading journal as sole engineer, with a custom **P&L** accounting engine.

Catalyst Insight Studio | *Python, Streamlit, pandas, scikit-learn* | Co-Developer May 2026 – July 2026

- Enabled General Chemistry II students and instructors to explore lab results in the browser with no install, by co-building a **Streamlit** app and owning its **pandas** data pipeline and **scikit-learn** models.
- Turned messy student survey exports into analysis-ready data, by building the normalization, cleaning, and validation pipeline.
- Kept the app working as the lab's data-collection forms evolved, by adding automated schema-mismatch validation and a **New Semester** tab for merging raw Excel exports.
- Eased handoff to the next student team, by breaking up a monolithic app into separate UI and data layers and writing **54 unit tests**.

Leadership

Data Science & Machine Learning Club (DSML) – CSUF Fullerton, CA

Vice President *January 2025 – May 2026*

- Led weekly presentations on core data science and machine learning concepts, combining theory with real-world applications.
- Ran live tool demonstrations to showcase practical application of core data science concepts.
- Hosted hybrid sessions to maximize accessibility, maintaining high attendance across both online and in-person audiences.
- Designed case study-driven curricula using realistic datasets to mirror production machine learning challenges.

Association for Computing Machinery (ACM) – CSUF Fullerton, CA

Artificial Intelligence Board Member *January 2025 – May 2026*

- Led an overhaul of presentation and workshop formats, increasing attendance by **30%+**.
- Revamped our engagement strategies, growing activity participation from negligible to **25+ students** in interactive activities.
- Built a more structured AI and ML learning environment, accessible to beginners while still offering depth for experienced members.

Technical Event Production & Outreach Fullerton, CA

Bridging the Gap Between Students and Industry *January 2025 – December 2025*

- Founded and coordinated a guest speaker series, hosting engineering leaders from companies including AWS to deliver panels on production architectures and data engineering.
- Attracted **20+ students per session** by promoting interactive discussions on modern cloud and back-end practices.
- Facilitated industry networking opportunities to prepare student members for technical interviews and post-grad career pathways.
