

ENDER BATU DEMIRTAŞ

(307) 301-7092 | ba2demirtas@gmail.com | linkedin.com/in/batu-demirtas | github.com/Batu-end | Fullerton, CA

EDUCATION

California State University, Fullerton

Fullerton, CA

Bachelor of Science in Computer Science

Expected May 2026

- **Relevant Coursework:** Data Structures, Software Engineering, Operating Systems, OOP, Back-end Development, Machine Learning

EXPERIENCE

Association for Computing Machinery (ACM) – CSUF

Fullerton, CA

Artificial Intelligence Board Member

January 2025 – Present

- Led an overhaul of presentation and workshop formats, increasing attendance by **30%+**.
- Revamped our engagement strategies, growing activity participation from negligible to **25+ students** in interactive activities.
- Contributed to a more dynamic and structured AI and ML learning environment, which is both accessible to beginners while also providing depth for experienced members and learners.

Data Science & Machine Learning Club (DSML) – CSUF

Fullerton, CA

Vice President

January 2025 – Present

- Conducting weekly presentations on core data science and machine learning concepts, combining theory with real-world applications.
- Implemented live demos to showcase practical uses of said concepts using popular and necessary tools.
- Hosted hybrid sessions to maximize accessibility and engagement from both online and in-person attendees.
- Emphasize understanding through grounded examples, case studies and realistic scenarios that reflect real world data and ML challenges.

PROJECTS

Memoria | *SwiftUI, SwiftData, Swift Concurrency, macOS SDK*

January 2026 – Present

- Developed a native macOS trading workstation with a local-first architecture using **SwiftUI** and **SwiftData** to enable zero-latency trade journaling and offline-first privacy.
- Engineered a background-threaded **Accounting Engine** using **Swift Structured Concurrency** (async/await) to compute VWAP, P&L, and win rates dynamically without UI lockups.
- Designed a high-density dashboard featuring **asynchronous watchlist sparklines** and responsive visual elements adapting to custom trader personas.
- Implemented keyboard-centric navigation and a rapid ghost-placeholder entry system, reducing trade logging friction to under 30 seconds.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

Cloud: AWS (EC2, S3, IAM, Bedrock, KMS, EBS)

Development & Collaboration Tools: Git, GitHub Kanban, Jira, Confluence, Slack

Technical Concepts: Algorithms, Machine Learning, APIs

LEADERSHIP & SOCIAL INFLUENCE

Expert Panels & Tech Leadership

Fullerton, CA

Bridging the Gap Between Students and Industry

January 2025 – Present

- Pioneered and spearheaded initiatives to bring veteran tech professionals from companies such as AWS to share their expertise with students, establishing a new platform for industry connection.
- Captured an attendance of **20 students per session** by promoting discussions on various topics like AI, back-end software, and data engineering.
- Provided insights into industry realities, essential skills, and strategies for keeping up with rapid technological advancements.
- Facilitated engaging conversations on career paths, certifications, impactful projects, and industry success strategies.
- Empowered students to become more industry-ready and better connected for future opportunities.
